

ABBE Refractometer 2WAJ

Measurement of refractive index nD, average dispersion nF-nC of transparent or mass translucent liquid and solid substances.

Measurement of fraction (Brix) of cane sugar solution.

Widely used in field of sugar, pharmaceutical, beverage, petroleum, food, chemical industries as well as research institutes and educational department.

Visual aim, optical index plate reading easy and reliable

Measuring rang of Brix	0 – 95 %
Measuring range of nD	1.300-1.700 nD
Accuracy of Brix	$\pm 0.2\%$
Accuracy of nD	± 0.0002
Weight of the instrument	3.5Kg
Dimensions of the instrument	270×180×370mm
