

# Hand Held Alcohol Refractometer VAL1

- Durable
- Fast and easy measurements
- Can achieve high precision

This optical refractometer has a scale in the range of 0 - 80 % V/V to determine the content of alcohol as a percentage of volume. The refractometer can be used for measuring the content of alcohol in all types of solutions containing alcohol.

High contrast demarcation line for easy, accurate readings. Easily adjusted zero line by means of readily accessible screw.

Scale range (min.)	0.0% V/V
Scale range (max.)	80.0% V/V
Resolution	1.0 %
Accuracy	±1.0 %
Size	27x40x160
Weight	175 g
