

Hand Held Milk Refractometer VMK1

- Durable
- Fast and easy measurements
- Can achieve high precision

For measuring the degree of evaporation in milk and determining the concentration in various fields of application.

The internationally approved Brix scale enables the weight percentage of dry matter to be determined directly.

This optical refractometer has a scale in the range of 0 – 32% Bx and 0 – 25% Soybean Milk concentration.

The reading resolution is 0.5 %Brix and 0.1% Soybean

	Range	Resolution
Brix scale	0 – 32 %	0.5%
Soybean Milk	0 – 25%	0.2%
