

Hand Held Brix Refractometer VBR50

- **Durable**
- **Fast and easy measurements**
- **Measures aqueous solutions with low sugar content**
- **Can achieve high precision**

This optical refractometer ("brixmeter") has a scale in the range of 0 - 50 °Bx (% of the sugar content in an aqueous solution - Mas Sacch). The reading resolution is 0.5 %. It is designed for the measurement of cutting or machining emulsions (the content of oil in an aqueous solution) or very low-concentrated sugar solutions.

Brix scale range (min.)	0
Brix scale range (max.)	50
Resolution	0.5%
Accuracy	±0.5%
